Leetcode

Summary

As a final-year B.Tech student specializing in Computer Science and Engineering with a focus on Data Science, I bring a strong academic background and growing expertise in Data Analytics, Machine Learning, and Data Science. I've demonstrated my capabilities through practical data analysis tasks. Eager to leverage and enhance these skills in a Data Analyst role, I aim to contribute effectively to dynamic professional environments.

Education

JSS Academy of Technical Education, Noida

Nov. 2021 to Present

Computer Science Engineering (Data Science)

- GPA: 7.5/10
- Coursework:** Data Structures Algorithm, DBMS, Theory of Automata, Computer Organisation and Architecture, Data Analytics, and Computer Network

Projects

IPL Power BI Dashboard

- Created an interactive Power BI dashboard to analyze IPL data up to the 2024 playoffs, offering insights into team performance, player stats, and match outcomes.
- Utilized advanced Power BI features like DAX and custom visuals to enable data-driven decision-making in sports analytics. [\[GitHub\]](#)

Super Store Sales Analysis

- Created an interactive Power BI dashboard with time series analysis for sales forecasting and data-driven insights.
- Delivered accurate sales forecasts and actionable recommendations, supporting business growth and efficiency. [\[GitHub\]](#)

Data Professional Survey Analysis

- Conducted in-depth analysis of data professional survey responses, identifying key trends and insights to inform strategic decision-making and industry understanding.
- Utilized advanced data analytics techniques to derive actionable recommendations from survey data, contributing to the enhancement of data professional practices and standards within the industry. [\[GitHub\]](#)

Apocalypse Store Sales Analysis

- Analyzed Apocalypse store sales data to uncover trends and insights, optimizing sales strategies for revenue growth.
- Utilized data visualization for effective communication, enabling informed decision-making to maximize profitability. [\[GitHub\]](#)
